STREAMS OF INFLUENCE.

Could we see distinctly the streams of influence, which daily, and hourly, and steadily flow out from their conduct in all direction, blessing or withering their neighbors, and all with whom they come in contact, how much more watchful and circumspet would they be than they now generally are. When we come to examine the constitution of society, we shall find ourselves surrounded by an atmosphere of influence in which every element is in constant vigorous reaction. Here man speaks, and eloquence is heard; he desires, and art becomes his hand maid; he defines and resolves, and law reigns; he reasons, and philosaphy ascends her throne; he unites his will with the will of his fellow men, and a world of his own appears. Every action draws after him a train of influence. Every individual is a centre, constantly radiating streams of influence. From the first moment of his active existence,

his character goes on daily and hourly, streaming with more of moral influence. A power which operates involuntarily; for though he can choose in any given case what he will do, vet he cannot choose what influence it will a boy, when he spoke out, 'saying: "Don't be have. In a few minutes the a social existence. It is indestructible; not a drum was produced, and our fifer made his apparticle is ever lost, but the whole of it is taken up into the general system; it is always tured fellow from the Dubuque mines, who in operation somewhere. And the influence which thus blends and binds him up with his, beight, invisible and impalpable as it is, is yet the mightlest element of society.

MAKING OTHERS HAPPY.

Have you made one happy heart to-day? How calmly you seek your pillow! how sweetly sleep! In all this world there is nothing so sweet as giving comfort to the distressed, as Ahere is not a moment that tearsare not shed and kind thoughts. How many wives, by recrimination, estrange and embitter loving hearts. GROWING OLD.

It seems but a summer since we looked for the glowing hopes and ambitions of early life pass away, as friend after friend depart, and the stronger ties which hold us here are broken, our life seems but a bubble, glancing for a moment in light, and then broken, and not a ripple left on the stream.

Forty years once seemed a long, weary pilgrimage to tread. It now seems but a step .--And yet along the way, are broken shripes where a thousand hopes have wasted into ashes; of tears; shadows even which we would not forget. We will garner the sunshine of those years, and with chastened s'op and hopes push on toward the evening whose single lights will soon be seen swinging where the waters are still and the storms never heat .- [T. LITTLE EDDIE-THE DRUM-

very touching story of a drummer boy: A few days before our regiment received orders to join Gen. Lyon, on his march to Wilson's Creek, the drummer of our company was taken sick and conveyed to the hospital, and on the evening preceding the day that we were to march, a negro was arrested within the lines of the camp and brought before our Captain, who asked him "what business he had within the lines," He replied: "I know a drummer that would like to enlist in your company, and

have come to tell you of it." He was immediately requested to inform the drummer that if he would enlist for our short term of service, he would be allowed extra pay, and to do this he must be upon the ground early in the morning. The negro was then passed beyond the

On the following morning there appeared before the Captain's quarters, during the beating of the reveille, a good looking middle-aged woman, dressed in deep mourning, leading by the hand a sharp, sprightly looking boy, apparently about twelve or thirteen years old .-His story was soon told. She was from East Tennessee, where her husband had been killed by the rebels, and all their property destroyed. She had come to St. Louis in search of her sister, but not finding her, and being destitute of money, she thought if she could procure a situation for her boy as drummer for the short time that we had to remain in service, she could find employment for herself, and perhaps find her sister by the time we were discharg-
